### DMin or Masters level

This course will explore the major global issues that confront the church today - globalisation, climate change, religious conflict, terrorism, global poverty - in order to develop a biblical perspective on the role of the people of God in the world. We will also seek to develop and evaluate the responses of the Christian church during last century to these issues in light of the biblical mandate, and consider the place of cross-cultural mission within the total global ministry of the church. Finally, we will create a broad range of practical steps that a local church can implement in order to develop a global vision and an effective involvement in the missionary task.
